A project to provide 10 beneficiaries of The Let Cerebral Palsy Kids
Learn Foundation with the a 2 Month Supply of Essential Medication
funded by The IREDE Foundation

Final Report

Medication Support Project: Final Report

Project Overview

The Medication Support Project in Collaboration with The IREDE Foundation aimed to provided essential Life Saving Medication to 10 beneficiaries of The Let Cerebral Palsy Kids Learn Foundation for a duration of 2 Months.

The Project Handover Event was held on Saturday 14th December 2024 and the Project End Date was Friday 14th February 2025.

Project Beneficiaries

10 Families raising children with Cerebral Palsy, There were 8 Male and 2 Female Beneficiaries. The primary caregivers present at the handover event were all women - 8 Mothers and 2 Grandmothers. The ages of the children ranged from 4 years old to 13 years old.

The occupations of the caregivers ranged from small scale trading to teaching and Administrative Support provision.

Project Impact - Overall Health

50% rated the health of their children as good **BEFORE** receiving the medication support, the rest rating as poor and fair

40% rated the health of their children as Excellent **AFTER** receiving the medication, 40% as Very Good and 20% as good.

100% of participants noticed improvement in their child's health condition after receiving the medication

Project Impact: Seizure Occurrence

40% of beneficiaries were experiencing daily seizures before the project
20 Monthly and
40% rarely

After the receiving the medication:
70% were rarely experiencing seizures and
30% never experienced a seizure

Project Impact: Livelihoods

80% of beneficiaries saw a **decrease** in their household expenses as a result of the medication support, and as a result, were able to allocate the resources to other essential needs such as diapers, food and even the payment of school fees for other children in the household
50% of beneficiary caregivers have been able to work more or find employment since receiving the medication for their children.

80% of beneficiaries report an improvement in family economic situations since receiving the medication,

Project Impact: Quality Of Life

100% of beneficiaries reported an improved quality of life for their children and improved ability to perform activities

Project Impact: Caregivers Mental Health

100% of beneficiary caregivers report an improvement in their mental health as the project relieved them of a major source of worry for 2 months.

Conclusion

The Medication Support Project was incredibly successful, improving quality of life for 100% of the children while also improving caregiver mental health for 100% of the caregivers.

The project also improved family economic situations for 80% of the beneficiaries and enabled 50% of the beneficiary caregivers to find work or improve their productivity.

Most importantly, the project also reduced the occurrence of seizures for all the beneficiaries.
